## Advanced Rebar Applications...

We are a service company specializing in the detailing of rebar for concrete reinforcing. Our primary focus is the development of rebar placing documentation and associated fabrication listings.

## Experience...

Advanced Rebar Applications has experience in variety of detailing applications. Structures we have detailed include: cast in place structural slabs and beams, pile caps and footings, foundation walls, retaining walls, circular tanks, bridges and masonry. Our staff includes a member of the ACI and a contributing member to the CRSI Reinforcing Bar Detailing committee. We have over 15 years experience in rebar detailing and project coordination. In 2007 we detailed over 80 imperial and metric projects, totaling more than 3500 tons.

## Service...

Advanced Rebar Applications has the strong understanding of reinforcing steel and its application to concrete structures. Our placing drawings are developed with these understandings and in conjunction with the implementation of ACI and CRSI detailing standards and specifications. Our placing drawings are created using computer aided drafting software. Drawings can be issued electronically or through traditional printed methods determined by the project's requirements. We have the capacity to create manual drawings or sketches as required. Material listings are created for every placing drawing we create. Material lists are created as per client requests and through communication to the client's customer. Our hours of operation are Monday thru Friday 7:30am to 4:30pm EST. We currently work with rebar fabrication shops throughout the eastern United States and parts of the midwest. However, we are continually looking to expand into new market areas throughout the United States, Canada and the internationally community.

## Our mission is simple...

- Provide product accurately, in a clear understandable format and in accordance with national recognized standards of practice.
- Be accountable to our client's needs and requests.
- Be knowledgeable and informative regarding our field, product and services.
- Maintain a focus on our client's costs and time management.
- Provide a professional product, with a professional attitude. Our work and service are reflective of our client.

## Further information...

Please visit our website at [www.rebarapps.com](http://www.rebarapps.com) for product samples and additional information. If you have any questions regarding this company, our product or experience, please feel free to contact our director of operations, Erik Polkowski. He would be glad to assist you, answer any questions that you may have and provide additional samples of work product for your review.

**Thank you for your interest in Advanced Rebar Applications.  
We look forward to working with you on your next project.**
