Advanced Rebar Applications...

We are a service company specializing in the detailing of rebar for concrete reinforcing. Our primary focus is the development of rebar placing documentation and the associated fabrication listings.

Experience...

Advanced Rebar Applications has experience in variety of detailing projects. Structures we have detailed include cast in place structural slabs and beams, pile caps and footings, foundation walls, retaining walls, circular tanks, bridges and masonry. Our staff has over 15 years experience in rebar detailing and project coordination. Projects associated with our staff include:
